

Million Fellas

„Million Fellas gehört zu Deutschlands vielversprechendsten Newcomer-Acts.“

quote: <https://reontour.blogspot.com>

The only constant is change, and the more it changes, the more it remains the same! Variation with recognition, driven by an unbelievable passion, in short, Million Fellas!

English-speaking Alternative-Indie-Rock with explosive breakdowns, driving rhythms, catchy lyrics and occasionally melancholic tones.

One thing is for sure, this music sets bodies in motion.

Somewhere in the province of Mecklenburg-Western Pomerania ... desolation, lack of perspective ... and of all things an idea of the frontman of the Foo Fighter, Dave Grohl, should change that. The cornerstone of Million Fellas is inevitably linked to the coincidental meeting of Keylipp and Eric in November 2018 in Berlin, when the two met at the music project #PLAY, just the aforementioned Dave Grohl, in which they participated as selected musicians. In the end they put the bass guitar around Lukas' neck and Million Fellas were founded in January 2019. After a line-up change at the beginning of the vocals, Eric takes over the vocals and Keylipp the backing vocals since 2020.

Meanwhile, Rostock is the new hometown of Million Fellas.

Million Fellas convince above all as a live band.

This has already been demonstrated impressively in numerous concerts in the past, e. g. in support of Dritte Wahl at the IGA-Park Rostock, at the Hanesail Rostock and at the Kieler Woche. Million Fellas were awarded the Audience Award at the 28th Landesrockfestival Mecklenburg-Western Pomerania 2021. At the Local Heroes National Final 2022, the Up&Coming Artist award was presented.

It's best to feel the energy at one of the live concerts yourself!

Live, Million Fellas are supported by guest musicians on bass (currently Robert Schwanke) and backing vocals and Lukas takes over the rhythm guitar.
